Ten Frame Flashcard Game

• Direction- Give your child 10-15 seconds to answer the question- what do you see?
• Once they've answered correctly, ask- How do you know? With this question you are promoting critical thinking skills by asking students to explain their thinking.
• If your child gives the wrong answer, simply have them count with you as you point to each dot. Then ask, What do you see? Your child should repeat the number just counted.
